

AC or DC?
Why not both?

HYNET bridges alternating and direct current to power Europe's energy future — smarter, cleaner, resilient.

PAN-EUROPEAN INTEROPERABLE AC-DC HYBRID ELECTRICITY NETWORKS

HYNET's mission is to demonstrate and accelerate the transition toward **hybrid AC/DC** power grids that are resilient, interoperable, and ready to meet Europe's renewable energy targets.

Demonstrations

Demo #1 – France

MVDC + LVDC systems
Stabilizing island grids & supporting
EV/hydrogen use

Demo #2 – Montenegro

Supports cross-border RES
exchange
Boosts grid stability and
resilience in the Balkans

Demo #3 – Norway

Offshore wind integration
SK12 corridor upgrade
evaluation

Demo #4 – Cyprus

Digital twin of entire transmission
grid
Great Sea Interconnector (CY-GR-IL)
resilience testing
